Attention!!!!

Lab Safety

To keep yourself and others safe in the lab you should remember to ...

- wear eye protection – Safety goggles
- read all directions carefully and listen to all instructions given
- work carefully and quietly
- never smell or taste anything in the lab
- dispose of all chemicals as told to you by the teacher
- never use lab materials for anything other than what you are instructed to use them for. Example: The spoon is used to stir chemicals and cannot be reused to eat food with.
- never look directly into the UV light or expose your skin to its light
- after all labs, wash hands thoroughly
